The Vision

To empower users to trade seamlessly across networks without sacrificing control of their assets, establishing TradeSta as the leading non-custodial platform for cross-chain swaps and leverage trading.

By simplifying gas fee management and enhancing transaction flexibility, we aim to bridge the gap between the user-friendly experience of centralized exchanges and the security and autonomy of DeFi.

Through cutting-edge technology, TradeSta is your Web3 gateway, transforming the way people engage in on-chain trading.

The Swap

The TradeSta Swap platform enables users to delegate any self-custody wallet compatible with WalletConnect directly to the platform.

TradeSta leverages delegation and account abstraction technology, allowing users to view all assets, balances, and perform instant swaps between assets.

Swap with zero native gas tokens, seamlessly on TradeSta. Gas fee is deducted from the swapped token itself, providing a smooth and convenient experience.

TradeSta offers competitive rates, with a 0.25% trading fee for same-network swaps and a 0.35% fee for cross-network swaps.

Select your preferred destination wallet for cross-network swaps or utilize your delegated wallet.

Margin Trading

TradeSta is set to revolutionize the decentralized finance (DeFi) landscape by introducing on-chain margin trading, leveraging our unique escrow contract model.

This innovative approach enables users to engage in leveraged trades without relinquishing custody of their assets, maintaining the core principles of security and sovereignty that define DeFi.

By utilizing smart contract-based delegation, users can authorize trades directly from their wallets, while the assets themselves are held securely in an escrow contract.

This method not only enhances security by minimizing trust but also increases transparency and efficiency in executing trades.

With on-chain margin trading, TradeSta aims to deliver a robust, user-centric trading experience that combines the flexibility of traditional trading systems with the inherent advantages of blockchain technology.

STA Token

Overview

The STA Token serves as the foundation of the TradeSta platform, designed to reward holders with a range of exclusive benefits, encouraging both the retention and long-term value of the token. By introducing holding requirements, we aim to reduce selling pressure while driving demand through incremental tier-based holding thresholds.

Benefits of STA Token

Discounted Swapping Fee

Simply by holding STA Tokens in their chosen delegated wallet, users can enjoy a discount on TradeSta's trading fees.

Voting Rights

The tiered system will allow only those who are most dedicated to have the opportunity to vote on future listings, developments and product changes.

VIP Support

Once you reach platinum status you are then assigned an account manager whom will be your personal point of contact. You will also gain 1-1 time with the team on a quarterly basis.

Airdrop Access

When ever TradeSta launches a new token those who hold STA will be Airdropped some of the new supported asset.
